About This Game

Stein bock games is always improving it's products in order to give a good gaming experience to our customer . We are always listening to our customers to find out what are their needs and wants in their game.

We value their opinion since to us it is one of the most important ingredient one can use in order to make a video game.

We believe in a philosophy of self respect and respect for others is the stepping stone for forging a lasting relationship with our customers.

With all that mentioned we would like to introduce our new release called On Board Remastered were we worked carefully to improve in the areas we felt our previous game from the On Board series.

It is not perfect,granted, but we believe that if we work hard we will be able to attend and please our customers and future new versions of the game will continue to be released.

As it currently stands our new release "On Board Remastered" has the following features:

Challenge Level: An infinite level were players can test their skills and accumulate points to be used to unlock new boats and place their name on the "High Score" board of the game.

New Sound Track: A new soundtrack for the game has been selected that aims to capture the sense of adventure and action in the game.

Brand New Ship: A brand new ship selection to be unlocked and played as the player unlocks the game. A total of 6 ships to be unlocked.

We hope these new changes in the new game of the series enhances gaming experience to the player. It is to be noted that we plan to improve on the aspect of these series as we keep on developing and releasing games. Anyone interested in giving us ideas how to improve our game please fill out our On Board Remembered survey.

We appreciate your time.
